

NIETC Apprentices
Points to Make When Applying for Unemployment

1. Always tell the truth.
2. Your trade classification is ELECTRICAL APPRENTICE.
3. Your classification allows you to work under the supervision of a licensed Journeyman Wireman.
4. You are placed on a job by the Training Center; you are not dispatched by Local 48.
5. This is the only way for you to get a job.
6. Although Local 48 does not condone members going “on the hook” if an employer does this to you, apply for Unemployment but be sure you have a specific return to work date (that is equal to or less than 4 weeks from date of layoff).
7. Read and follow the instructions in the Claimant Handbook you are sent when you initially file a claim (also available online). Failure to follow all instructions may result in a delay or even denial.
8. If you are denied, file an appeal immediately and make an appointment with Legal Counsel, Diana Winther (503-889-3669) without delay.
